

# **BALE BANDIT**

## **2000 SERIES**

**Being first did not make us the best. Being the best has kept us first!**

**BANDIT INDUSTRIES BLUFFTON, ALBERTA, CANADA 403-783-4284**

The Bale Bandit has evolved from single axle agriculture units to 34 bale commercial units over the course of 23 years of commercial experience.

The 2000 series HSS steel frame with all welded tube cross members for torsional strength.

The carrier cross members are welded to the frame to accommodate the torsional flexing that comes with day in, day out, work.

Unitized QT 100 fork construction means long lasting smooth operation.

## 4017 and 4017S shown

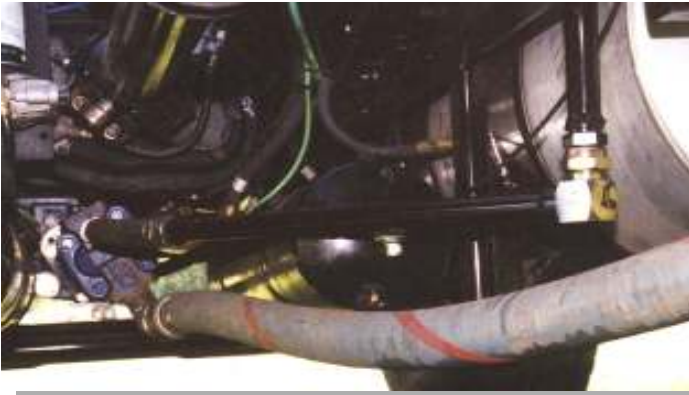

Simple PTO mounted pump means:

- Trouble free pumping
- Reliable
- High volumes up to 50 gallons per minute

To reduce back pressure to a minimum large flow lines, pressure filter and an in tank filter are used.

Keeping the distance the oil has to flow from the pump back to the tank as short as possible is important to reduce pressure drop and therefore heat. The aluminum tank also radiates heat.

By mounting the valve bank on the carrier close to the functions it keeps things tidy while reducing hose length, pressure drop, and heat generation.

- T4017** shown with
- cab guard
  - spark arresters
  - Bandit Bar
  - bale splitter
  - stack tine

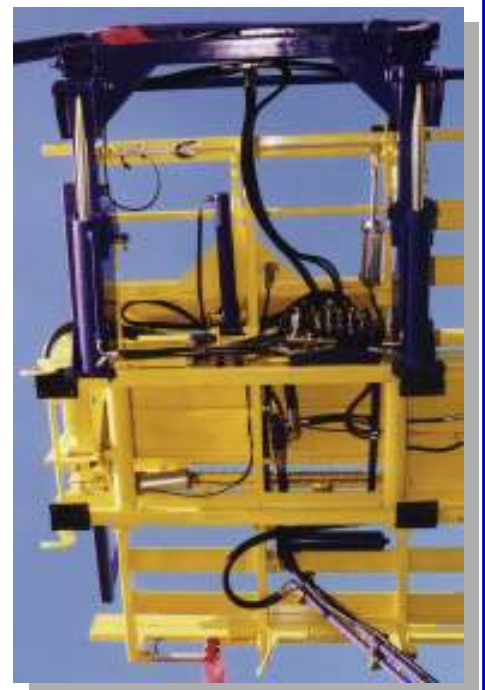

Full fenders keep the road grim where it is supposed to be. All units come with frame covers to keep loose hay and strings off your drive line and save your seals. The open design of the rails lets the rails carry the bales so even surface wrap bales remain undamaged.

Plumbing neat and tidy

Modular fork for easy removal when you don't need it.

The Bale Bandit carrier mounted fork and air operated frame lock system work together to transmit the stress of loading bales vertically onto the trucks frame rails maintaining full truck frame warranty.

Roof mounted fully extendable mirror bars with built in break a ways in case of accidental collision which saves cab structure from damage. With these mirror bars not only can you tell whether it is a pickup or a car behind you, but what make it is. They really do work.

Conspicuity tape  
O.D. sign,  
Lighting,  
all conform to D.O.T standards.  
Hydraulic tail gate to keep load secure.  
Optional under ride protection.

Air operated fork lock to keep fork locked tight while in transit.

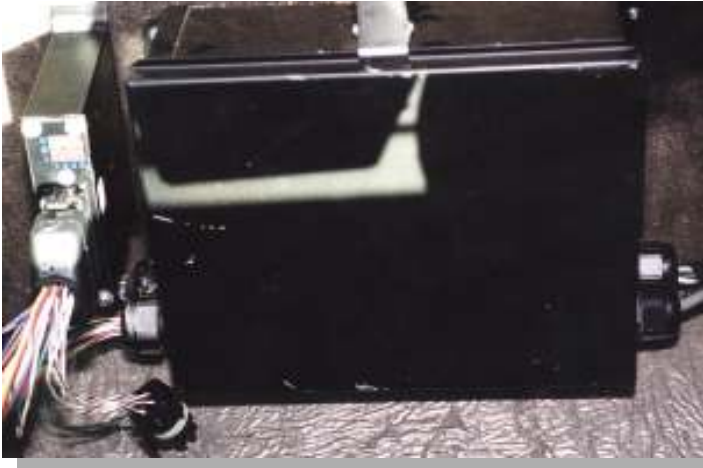

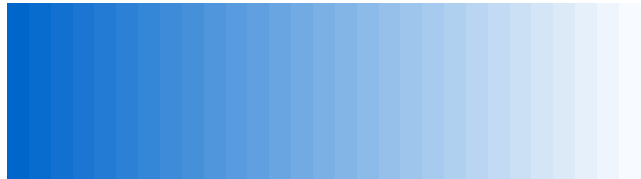

**T4017 and T4017S shown**

**OPTIONAL:**

State of the art multifunction joystick controls all carrier functions mounted in a stainless steel fully adjustable console.

All electronic control interface connections for above made inside cab sealed junction box.

Short, neat, and tidy sums up the valve bank wiring.

Light harnesses are pre-manufactured mold sealed units with any other connections being soldered and seal shrink tubed for long life.

## Popular Options

### Bandit Bar

-5/16" QT 100 formed bumper

-1/4" T6 6061 Aluminum folding collision bar

Aluminum hydraulic tank with clean out, in tank filter, magnet, heater, low oil alarm and site glass.

### Steer axle air ride

Cab guard and spark arresters

### QT 100 Pup Hitch

The offset top bale is why our system works so well in any terrain or condition. Consistently load 17 bales in under ten minutes.

With our proprietary bale clamp to hold the bale in the fork as you put it on top loading is fast and easy.

A system that doesn't understand limitations.

Efficiency and flexibility at its best

**T4017TS and P4017TS**  
Exclusively available to The Bale  
Bandits franchise owner operators

Self loading 34 bale truck and pup  
Transferring on to pup

**T1000, T2000 and  
T4000 series carriers**  
built to work in  
the worst Canada's  
north can handout.

These units are built  
to work in the real  
world by people that  
have used them in  
that world for 23  
years. Loading in  
flat fields to foot hills  
hauling perfect bales  
to not so perfect bales.  
Easily loading 34 bales  
in 20 minutes.

## **BALE BANDIT T 1000 SERIES ROUND BALE CARRIER'S STANDARD FEATURES:**

Six , eight , ten and twelve bale models

Mild steel and H.S.S. carrier and fork structure

H.S.S. main frame

All welded construction

D.O.T. lighting with truck light sealed wiring harness, conspicuity tape , flags and signs

Electric over hydraulic on / off controls controlled from inside cab

Single speed folding push off with 4 rollers and ball bearings

Drive sprockets machined from work hardening alloy steel

Hydraulic tailgate

Fenders , frame covers and mud flaps

Extendable mirror bars with built in break away

20 gal / min hydraulic system with return filter

Two wire hose and steel hydraulic lines

All wiring and hydraulic supplies for installation except suction line and hydraulic tank

Finish - metal prepped and two tone urethane paint and decals

**OPTIONS:** work lights /warning lights

tool box

spare tire rack

chain rack

bale spreader bar

stack tine

quick attach

cab guard

hoist

**PTO**

hydraulic tank

spare parts kit

These models have been designed with the economics of the end user in mind and are not intended for custom hauling.

## **BALE BANDIT T 2000 SERIES ROUND BALE CARRIER'S STANDARD FEATURES:**

Fourteen and seventeen bale models

Alloy, Mild steel and H.S.S. carrier and fork structure

Top load fork

H.S.S. main frame

All welded construction

D.O.T. lighting with truck light sealed harness, conspicuity tape, flags and signs

Electric over hydraulic on / off controls controlled from inside cab

Single speed folding push off with 4 rollers and ball bearings

Drive sprockets machined from work hardening alloy steel

Hydraulic tailgate

Fenders , frame covers and mud flaps

Extendable mirror bars with built in break away

30 gal / min hydraulic system with return filter

Two wire hose and steel hydraulic lines

All wiring and hydraulic supplies for installation except suction line and hydraulic tank

Finish - metal prepped and two tone urethane paint {standard color white secondary color to match truck} and decals

**OPTIONS:** work lights /warning lights

tool box

spare tire rack

chain rack

bale spreader bar

stack tine

quick attach

cab guard

hoist

## **BALE BANDIT P2014 TANDEM STIFF POLE PONY TRAILER STANDARD FEATURES**

HSS STEEL FRAME RAILS WITH WELDED CROSS MEMBERS  
REYCO 21 B SUSPENTION

OVER ALL LENGTH	11 m
CARRIER LENGTH	7.87 m
WIDTH	3.05 m

11,500 kg 200 cm TRACK AXLES

ABS BRAKES

22.5 X 8.25 DAYTON WHEELS

LOW PROFILE BRIDGESTONE M840 TIRES

TWO MUD FLAPS FRONT AND BACK

QT 100 FORMED AND FABRICATED SELF CLEANING SLIDING POLE AND RECEIVER

ELECTRIC AIR OPERATED HITCH LOCK

PAINT ; DIRECT TO METAL PAINT

BOLT ON 14/ 15 ROUND BALE CARRIER WITH ; D.O.T. LIGHTING, CONSPICUITY TAPE, FLAGS AND SIGNS

: SEALED TRUCK LIGHT LIGHTS AND WIRING HARNESS

: THREE BACK UP LIGHTS

: HYDRAULIC OPERATED TAILGATE / OD SIGN

: FOLDING PUSH OFF WITH 4 ROLLERS

: DRIVE SPROCKETS MACHINED FROM WORK HARDENING ALLOY STEEL

: ELECTRIC ON/OFF HYDRAULIC VALVES

: STEEL LINES, TWO WIRE HOSE WRAPPED WITH SPIRAL WRAP IN HIGH WEAR AREAS.

: ALL CONTROLS ELECTRIC OVER HYDRAULIC FROM INSIDE THE TRUCK CAB

OPTIONS : PUP FRAME WITH PIN ON TAIL SECTION SO PUP CAN BE USED FOR GRAIN, GRAVEL, TANKS ECT.

: BRACES UNDER CARRIER FLAT IRONS FOR HAULING YOUR LOADER TRACTOR

: SWING OUT LIGHTS

: SAND BLAST AND ENDURA PAINT

: L.E.D. LIGHTS

EMAIL [b-bandit@telusplanet.net](mailto:b-bandit@telusplanet.net)

We look forward to speaking with you in the near future. When you compare our carrier you will find that our design provides the up time that is needed to make the profit you are looking for. From alloy steels in the high stress areas to the heavy duty cylinders, valves, bearings, motor and pump. Our proprietary front drive system which keeps it out of the dirt, twine, and hay with our own sprockets machined out of a work hardening alloy steel. Our unique push off with industrial rollers and alloy steel guide rails makes our unit the gentlest on bales and the most trouble free design, our unique frame cover design keeps all the string, hay, straw, snow and anything else from getting built up, wrapped around or caught on the truck frame, drive line or suspension. Our large volume hydraulic systems with high pressure lines, two wire hose wrapped with spiral wrap guard in high wear areas. The hydraulic hose make up a extremely reliable scissor to keep the lines as short as possible making for easy service and less heat. When you add all this together it is not hard to see why we have twice been recognized as the world leader of round bale hauling technology. If there are any questions that we have not answered for you or anything else we could help you with please do not hesitate to call me personally and thank-you for your interest in what I believe to be the worlds best.

**HAVE A GREAT DAY!**
